

## ASCII Codes

ASCII stands for American Standard Code for International Exchange. It is an important part of computer programming. ASCII plays an important role by giving codes to all digits and symbols.

Here I am mentioning ASCII of important characters: -

- 0-9 -> 48 – 57
- A-Z -> 65 – 90
- a-z -> 97 – 122
- space -> 32

These are some ASCII codes you need to know as they sometime are very important.
